SUBJECT INDEX

VOLUME 3

- Abelson murine leukemia virus
homologous cellular RNA, 773
monoclonal antibodies to transformed cell phosphotyrosine, 1343
transformed cell lines lacking a phosphoprotein, 56
- Abelson virus
infected lymphocytes, 596
- Acid phosphatase
physiological control in *S. cerevisiae*, 839
- Actin
human types, genes, 1783
linked genes in sea urchin, 448
mRNA levels affected by changes in cell configuration, 182
mRNA production in rat brain, regulation, 1333
mRNAs for human, cDNA clones, 787
sea urchin, genes, organization and evolution, 1824
synthesis in cytochalasin D-treated cells, 132
- Adenine
in adenine phosphoribosyltransferase-deficient cells, 82
kinetics in L929 and CHO cells, 82
- Adenine phosphoribosyltransferase
deficient mammalian cells, adenine transport in, 82
- Adenovirus type 2
cellular gene expression, control during infection, 819
effect on host mRNA metabolism, 1212
VAI RNA gene promoter components, 1996
- Adenovirus type 5
E1A, protein, localization, 829
E1A control of gene expression, 1222
E1A control of transcription in *X. laevis* oocytes, 2131
infection, effects on HeLa cell rRNA, 662
SS-B/La nuclear antigen, phosphoprotein, 1235
- ADRI gene
regulatory, *S. cerevisiae*, 360
S. cerevisiae, isolation and characterization, 360
- α -Fetoprotein
mouse minigenes, 1295
- African green monkey DNA
library substituting for signals in thymidine kinase gene, 643
polyadenylation signals, 643
- Albizzin
isolation of CHO cell asparagine synthetase overproducers, 391
resistance in CHO cells linked to gene amplification, 391
- Alcohol dehydrogenase
transposable element-associated mutations in *S. cerevisiae*, 20
- Alu sequences
Z-DNA sequence in, 960
- amdS
Aspergillus nidulans, 1430
- Ammonia
regulation of amino acid permeases in *S. cerevisiae*, 672
- apt
CHO cell locus, mechanism of mutation at, 1703
- ARO1
cluster gene in *S. cerevisiae*, 1609
- ARS sequences
mouse chromosomal DNA, in yeasts, 1898
- α -Satellite array
interruption by monkey *KpnI* DNA, 967
- Asparagine phototrophs
5-azacytidine induced, 1937
- Asparagine synthetase
CHO cell overproducers, isolated with albizzin, 391
in 5-azacytidine-induced Jensen rat sarcoma cells, 1937
- Aspergillus nidulans*
amdS gene, 1430
- Aspergillus* spp.
5-azacytidine effects, 2287
fluffy phenotype conversion, 2287
- Autographa californica* nuclear polyhedrosis virus
expression vector for human beta interferon, 2156
- Avian leukosis virus
lymphomas, immunological phenotype, 1077
- Avian reticuloendotheliosis virus
cloning vectors, helper cell line, 2241
- Avian sarcoma virus
regulatory elements in long terminal repeat, 1975
RNA polymerase II promoters in long terminal repeat, 811
- 5-Azacytidine
asparagine-independent Jensen rat sarcoma cell variants, 1937
fluffy phenotype in treated *Aspergillus* spp., 2287
- Baculovirus
expression vector for human beta interferon, 2156
- β -Globin
promoter, enhancer effects in mouse cells, 1246
- Bovine papilloma virus
gene activator, 1108
stable hybrid plasmid for dominant selective trait, 2110
vector bearing human interferon B₁ gene, 233
vector enhancing hepatitis B surface antigen production, 1032
- Brain, rat
cytoskeletal mRNAs in development, 1333
- Calcium
deprivation for arrest of polyamine synthesis, 480
- Calmodulin
phosphorylated form, 1412
- Catalase T
S. cerevisiae structural gene, 1545
- Catenation
DNA, in vivo, 126
- CDC8 gene
S. cerevisiae, cloning, 1730
- cDNA
Dictyostelium germination-specific clones, 1943
full-length human actin, clones, 787
sequences from sea urchin embryos, 1021

- Cell configuration
 role in regulating actin mRNA, 182
- c-fms* oncogene
 transcription during mouse development, 1062
- c-fos* gene
 FBJ murine osteosarcoma virus *v-fos* homolog, 914
- Chicken embryo limb bud cells
 viral infection of chondroblasts, 1518
- Chimeric plasmids
 simian virus 40-hepatitis B virus, 2250
- Chinese hamster cells
 albizziin selection of asparagine synthetase overproducers, 391
 amplification of dihydrofolate reductase gene in DHFR⁻ cells, 1274
 amplified dihydrofolate reductase sequences, 699
 aprt locus, mechanism of mutation, 1703
 autosomal loci, mutation, 1172
 chromosomal assignment of CHO cell enzyme loci, 1967
 chromosomal rearrangements in CHO cells, 1967
 dihydrofolate reductase gene, phenotypic rescue, 1266
 diphtheria toxin, fate in resistant cells, 1283
 emetine-resistant mutants, proteins in, 190
 EmtA EmtB double mutants, 761
 emtA, *emtB*, *emtC* mutants, distinction, 429
 formycin B-resistant CHO mutant cells, 1468
 HGPRT locus, deletion, amplification, 1086
 increased mutation in serially selected ovary cells, 1882
 multiple independent emetine resistance genes, 198
 ribosomal protein S14, 190
 thymidine kinase gene, 1815
 transfer of human genes into CHO cell mutants, 892
 unstable multidrug cross-resistance, 1634
- Chitin
 deposition in *S. cerevisiae cdc* mutants, 922
- Chlamydomonas reinhardtii*
 tobenized, cell cycle transcription, 1537
- Cholera toxin
 endocytosis by neuroblastoma cells, 91
- Chondroblasts, presumptive
 chick limb bud, viral infection, 1518
- Chromatin
 structure formed by simian virus 40-pBR322 plasmids, 2203
- Chromosome
 mediating transfer of hydroxyurea resistance, 1053
 new one for *S. cerevisiae*, 415
- Cleavage
 mouse pre-rRNA, 1501
- Collagen
 inhibition of synthesis by phorbol esters, 1527
- Core histone mRNA
 accumulation in sea urchin embryos, 974
- COS-1 cells
 chromatin structure formed by plasmids, 2203
- Cos-1 cells
 polyadenylation, processing analyzed with *tk* gene, 267
- c-ras*^{K1} oncogene
 transcription during mouse development, 1062
- CUP1 region
 tandem gene iteration in industrial yeasts, 1353
- Cyclic AMP
 dependent protein kinase mutant, reversion, 250
- Cycloheximide
 resistant *T. thermophila* mutant with altered growth properties, 503
- Cytochalasin B
 altered cell spreading, 113
- Cytochalasin D
 actin synthesis in HEP-2 cells, 132
 Chinese hamster ovary cells, unstable resistance, 1634
- Cytomegalovirus
 DNA sequence hybridizing with mammalian elements, 1389
 repetitive cell DNA sequence in, 1389
- Cytoskeleton
 glycoconjugates association with, 684
 mRNAs and brain development, 1333
- Cytoskeleton, cellular
 herpesvirus proteins, localization, 315
- Deletion mutants
 F8dl, in study of simian virus 40 transformation, 290
 simian virus 40 A gene, proteins encoded, 220
- Desmin
 degradation by specific protease, 1146
- Dibutyryl cyclic AMP
 resistant mutants from cAMP-dependent mutants, 250
- Dictyostelium discoideum*
 membrane glycoprotein gp80, monoclonal antibody, 863
 nuclear transit times for different mRNAs, 1511
 spore germination-regulated DNA sequences, 1943
 transformation, T1
- Dihydrofolate reductase
 chimera, constructed, 32
 engineered mouse minigenes, 257
 gene amplified by transfer to DHFR⁻ cells, 1274
 gene expression, adenovirus type 2 control, 819
 gene identified by phenotypic rescue, organization, 1266
 genes from DHFR cDNA segment, 1598
 Harvey sarcoma virus long terminal repeat, marker constructed, 32
 mRNA, growth-dependent expression, 1598
 mRNA, processing in mouse fibroblasts, 1792
 transfected and amplified sequences in CHO cells, 699
- Diphtheria toxin
 fate in toxin-resistant hamster and mouse cells, 1283
- DNA
 African green monkey, library, 643
 amplified in *N*-(phosphonacetyl)-L-aspartate-resistant hamster cells, 2076
 binding properties of simian virus 40 replication-defective mutants, 1958
 binding protein in *Ustilago maydis*, 605
 catenation, decatenation in vivo, 126
 cytomegalovirus, repetitive cell sequence in, 1389
 D. melanogaster, organization at cuticle locus, 1724
 extrachromosomal, of pea, 172
 germ line-specific in *Tetrahymena*, 1909
 hybridization with mouse intracisternal A particle genes, 1371
 mitochondrial, and oligomycin resistance, 1694

- Moloney sarcoma virus proviral, transforming activity, 305
- mouse chromosomal sequences, *ARS* function in yeasts, 1898
- porcine major histocompatibility sequences, expression, 2006
- procaryotic, inhibits mammalian cell transformation, 956
- rearrangements in *Trypanosoma* antigenic variation, 399, 410
- repetitive, associated with major histocompatibility genes, 903
- replication forms in hypotrichous ciliates, 1562
- replication, inhibition by hydroxyurea in mouse cells, 297
- S. cerevisiae cdc2* mutant, stably denatured regions, 1665
- simian virus 40, UV-damaged, pyrimidine in, 1403
- tightly bound to protein in HeLa cells, 1567
- transfected, homologous recombination between, 1680
- Double-stranded RNA**
- M₂*, exclusion in *S. cerevisiae* killer systems, 654
- Drosophila melanogaster*
- glue protein genes, location, 623
- heat shock alters ribonucleoproteins, 161
- highly conserved heat shock protein genes, 1540
- larval cuticle locus, DNA structure, 1724
- polytene chromosome puff, glue protein genes, 623
- S6 protein, dephosphorylation in heat shock, 2017
- E1A_s protein**
- localization in adenovirus-infected cells, 829
- E1A gene, adenovirus**
- gene expression control, mediation of, 1222
- Eco gpi**
- glucocorticoid regulation, 1421
- mouse mammary tumor virus fusion plasmid, 1421
- Embryonal carcinoma cells**
- human-mouse teratocarcinoma hybrids, 2259
- muscle differentiation, 2280
- neural differentiation, 2271
- Emetine**
- multiple resistance genes in Chinese hamster cells, 198
- resistant CHO cells, ribosomal protein S14, 190
- EmtA EmtB double mutants**
- Chinese hamster cells, construction, 761
- emtA*, *emtB*, *emtC*
- Chinese hamster cells, distinction, 429
- Epithelial keratins**
- tissue specificity, 495
- Erythroleukemia cells, mouse**
- differentiating, mRNA regulation in, 1197
- Escherichia coli**
- β -galactosidase produced in *S. cerevisiae*, 1625
- lacZ* fused to *S. cerevisiae HSP90*, 1625
- lacZ* fused to *S. cerevisiae leu2*, 580
- retrovirus *gag* gene expression, 1746
- Euglena gracilis*
- uracil compartmentation, 613
- Euplotes eurytostomus**
- DNA replication forms, 1562
- Expression**
- cDNA inserts, new cDNA cloning vector, 280
- hepatitis B virus gene with recombinant plasmid vectors, 143
- human histone gene, regulation, 539
- human interferon B₁ gene, bovine papilloma virus vector, 233
- S. cerevisiae* mitochondrial tRNA gene, 371
- thymidine kinase gene in TK⁻ mouse cells, 511
- FBJ murine leukemia virus**
- genome structure, 914
- helper virus, 914
- Fibroblasts**
- Abelson murine leukemia virus-transformed, lacking phosphoprotein, 56
- altered cell spreading in cytochalasin B, 113
- antibody modulation of proteins in virus-infected, 1580
- chick, mitogen stimulation of phosphotyrosine in, 380
- Filaments**
- intermediate, in fibroblasts in cytochalasin B, 113
- Formycin B**
- Chinese hamster ovary cells, resistant mutants, 1468
- Friend spleen focus-forming virus
- viral transforming function in thymidine kinase vectors, 2191
- Fusion**
- spontaneous, normal host and tumor cells, 523
- Genetic map distances**
- equation to determine from tetrad data, 1886
- Gene transfer**
- human into CHO, efficient procedure, 892
- Globin, α and β**
- regulation of mRNA, 229
- Glucocorticoid hormones**
- dependent adult liver cell line, 1013
- modulate murine mammary tumor virus transcription, 551
- regulation of gene expression, 149
- regulation of mouse mammary tumor virus expression, 2045
- response variants, immunological selection, 1310
- Glue proteins**
- Drosophila*, chromosome location, 623
- Glycoconjugates**
- association with cytoskeletal framework, 684
- GM₁ ganglioside**
- exogenous, endocytosis by neuroblastoma cells, 91
- Growth regulation**
- melanoma cells, by interferon, 780
- Harvey murine sarcoma virus**
- long terminal repeat in simian virus 40 recombinant, 325
- Harvey sarcoma virus**
- dominant, selectable marker constructed, 32
- long terminal repeat chimera, 32
- Heat shock**
- gene, human, during adenovirus infection, 2058
- regulated production of *E. coli* protein in *S. cerevisiae*, 1625
- response in *Drosophila*, 2017

- ribonucleoprotein assembly altered in *Drosophila*, 161
- Heat shock proteins
cytoplasmic granules in tomato cells, 1648
highly conserved mouse and *Drosophila* genes, 1540
simian virus 40-induced, 1
- HeLa cells
histone mRNAs, synthesis and accumulation, 539
protein synthesis despite mRNA breakdown from interferon, 64
tightly bound DNA-protein complexes, 1567
- Helper cell line
avian reticuloendotheliosis virus cloning vectors, 2241
construction, 2241
- Hepatitis B virus
RNA polymerase II transcript encoded, 1774
transcription by RNA polymerase II, 1766
- Hepatitis B virus surface antigen
enhanced production with bovine papilloma virus vector, 1032
gene expression studied with new host-vector system, 143
gene, processing and polyadenylation signals, 2250
plasmid-directed synthesis in monkey cells, 44
- Herpes simplex virus
 β and γ gene expression, 2028
effect on Vero cell microfilaments, 712
nuclear localization of proteins, 315
- Heterogeneous nuclear RNA
dihydrofolate reductase, delayed processing, 1792
- Histone mRNA
serum-stimulated mouse fibroblasts, 1920
- H-2K^b antigen
gene identified by hybridization with oligonucleotides, 750
- H1 mRNA
accumulation in sea urchin embryos, 974
- HTC cells
mutants defective in glucocorticoid-regulated gene expression, 149
- Human α -tubulin
gene expression, 1738
- Human β -tubulin
isotypes identified, 854
- Human epithelial cells
tissue specificity of keratins, 495
- Human hepatoma cell line
plasma protein secretion in new cell line, 1133
- Hybrids
human-mouse teratocarcinoma lines, 2259
- Hydroxyurea
chromosome transfer of resistance, 1053
enhancement of resistance and gene amplification, 1097
mechanisms of DNA replication inhibition in mouse cells, 297
- Hypoxanthine-guanine phosphoribosyltransferase
HGPRT locus in Chinese hamster cells, 1086
- Immunoglobulin heavy-chain locus
productive and sterile transcripts, 1317
- Industrial yeasts
tandem gene iteration at *CUP1* region, 1353
- Insect cells
human beta interferon, baculovirus vector, 2156
- Interferon
 β gene, inducible expression, 233
growth regulation of melanoma cells, 780
human, baculovirus vector, in insect cells, 2156
inhibition of pinocytosis, 1533
mRNA breakdown in treated HeLa cells, 64
pp60^{src} synthesis in virus-transformed rat cells, reduced, 1656
resistant cell line, 1759
- Intracisternal A particles
methylation, rearrangement of mouse genes, 1371
- Invertase
S. cerevisiae, *SUC2* mRNAs, 439
- Iontophoresis
microinjection of DNA, 1803
- Isozyme
plasminogen activator, effect of extracellular matrix, 982
- Karyoplasts
macromolecular synthesis, 1866
- Killer toxin
S. cerevisiae, secretion, 1362
- Kirsten murine sarcoma virus
ras in 3-methylcholanthrene-transformed cells, 2298
ts mutant, transformation of rat thyroid cells, 2099
- KpnI* DNA
interruption of a cloned monkey α -satellite array, 967
- Lectins
resistant rat skeletal myoblast mutants, 2166
- Leishmania enriettii*
tubulin gene arrangement, 1070
- Liver
regulation of mouse major urinary protein gene, 2232
- Liver cells, adult
glucocorticoid-dependent cell line, 1013
- Liver hepatoma cells, rat
rat growth hormone gene, inactivity, 1460
- Long terminal repeats
mouse VL30 genes, 2221
- L6 rat myoblasts
myogenesis and RNA polymerase II mutations, 946
- Lymphocytes
Abelson virus-infected, 596
- Lymphomas
avian leukosis virus-induced, immunoglobulin, 1077
- Macromolecular synthesis
regenerating karyoplasts, 1866
- Major histocompatibility genes
repetitive DNA associated with, 903
- Major urinary protein genes, mouse
regulation in liver, 2232
- MAL* gene family
maltose fermentation in *S. carlsbergensis*, 796
- Measles virus
effect on Vero cell microfilaments, 712

- Metastasis**
 spontaneous fusion of normal host and tumor cells, 523
- Methylation**
 inhibits transforming activity of cloned Moloney sarcoma virus DNA, 305
- 3-Methylcholanthrene**
 transformed cells, presence of *ras* oncogene, 2298
- Microfilaments**
 Vero cell, effects of virus infection, 712
- Microinjection**
 iontophoretic, for DNA transformation, 1803
 purified pp60^{src}, 102
 TK gene-polyomavirus DNA plasmids in mouse cells, 511
- Minigenes**
 mouse, α -fetoprotein, expression, 1295
 mouse, dihydrofolate reductase, 257
- Mitochondria**
S. cerevisiae, gene expression, 371
- Mitochondrial DNA**
 analyzed in oligomycin-resistant mouse cells, 1694
- Mitochondrial RNA**
S. cerevisiae var1, 1615
- Mitogen**
 stimulated chick fibroblasts, tyrosine phosphorylation in, 380
- Moloney sarcoma virus**
 transforming ability inhibited by methylation, 305
- Monoclonal antibody**
D. discoideum membrane glycoprotein gp80, 863
 phosphotyrosyl proteins, 1343
- Mouse-human hybrid cells**
 expression of human U1 small nuclear RNA, 2211
- Mouse lymphoid cells**
 selection, glucocorticoid responsiveness, 1310
- Mouse mammary tumor virus**
Eco gpt fusion plasmid, *Eco gpt* expression, 1421
 gene product expression for immunological selection, 1310
 glucocorticoid regulation of promoter, 2045
- Mouse VL30 genes**
 structure, expression, 2221
- mRNA**
 decay in interferon-treated, virus-infected HeLa cells, 64
 dihydrofolate reductase, delayed processing, 1792
 dihydrofolate reductase, from cDNA genes, 1598
 encoding *S. cerevisiae* invertases, 439
 heat shock-induced mouse, conserved, 1540
 histone, accumulation during HeLa cell cycle, 539
 histone, in serum-stimulated fibroblasts, 1920
 host, adenovirus infection, 1212
 human actins, cDNA clones, 787
 human heat shock, during adenovirus infection, 2058
 keratin, two families in human epithelial cells, 495
 liver-specific, transcription in hepatocytes, 1552
 major urinary protein, mouse, levels in liver, 2232
 meiosis-specific in *Tetrahymena*, 1857
 nuclear transit times in *D. discoideum*, 1511
 p53, mechanisms regulating, 2143
 precursors encoding μ chain forms, 1317
 procollagen, in procollagen synthesis, 241
 ribulose-1,5-bisphosphate carboxylase in pea plants, 587
 sea urchin, H1 and core histone, 974
 sea urchin, pluteus, sequences cloned, 1021
 translatable, modulated by platelet-derived growth factor, 1478
 tubulin, actin in rat brain, 1333
 utilization in differentiating erythroleukemia cells, 1197
- Murine erythroleukemia cells**
 α - and β -globin gene regulation, 229
- Murine leukemia virus**
 provirus in radiation-induced mouse thymoma cells, 1675
- Muscle**
 differentiation in embryonal carcinoma cells, 2280
- Mutagenesis**
 simian virus 40, unrelated to transformation, 421
- Myogenesis**
 effects of RNA polymerase II mutations, 946
- Neuroblastoma cells**
 endocytosis of cholera toxin and GM₁ ganglioside, 91
- Nucleoside transport function**
 purine biosynthesis and salvage in murine cells, 1187
- Nucleosomes**
 regular arrangement on *Xenopus* 5S rRNA genes, 720
- Oligonucleotides**
 hybridization with H-2K^b gene, 750
- Oxalurate**
 induction of multiple *URA3* transcripts in *S. cerevisiae*, 1889
- Paramecium**
 surface protein genes, 466
- pBR322**
 simian virus 40 recombinant plasmids, chromatin structure, 2203
- p53 cellular antigen**
 regulatory mechanisms, 2143
- Pea (*Pisum sativum*)**
 extrachromosomal DNA, 172
 mRNA for ribulose-1,5-bisphosphate carboxylase, 587
- Permease**
S. cerevisiae, amino acid specific, ammonia regulation, 672
- Phosphocalmodulin**
 chicken brain and muscle, 1412
- N-(Phosphonacetyl)-L-aspartate**
 amplified DNA in resistant Syrian hamster cells, 2076
- CAD genes in resistant Syrian hamster cells, 2066**
 single-step mutants of resistant Syrian hamster cells, 2089
- Phosphotransferase**
 specific activity of pp60^{v-src}, 1589
- Physarum polycephalum**
 extrachromosomal rDNA, inheritance, 635
- Phytohemagglutinin A**
 resistant rat skeletal myoblast mutants, 2166

- Pinocytosis
inhibition by interferon, 1533
- Plasma proteins
induction in new hepatoma cell line, 1133
- Plasmids
cDNA cloning vector in mammalian cells, 280
mouse mammary tumor virus-*Eco gpt*, mouse cells, 1421
multiple, tandem integration in *S. cerevisiae*, 747
polyomavirus recombinants with transforming potential, 1670
simian virus 40-based, hepatitis B surface antigen gene, 44
stable, bovine papilloma virus, 2110
thymidine kinase gene-polyomavirus DNA, in mouse cells, 511
to express hepatitis B surface antigen gene, 143
- Plasminogen activator
isozyme activities, effect of extracellular matrix, 982
- Platelet-derived growth factor
cell proteins modulated by, 70
translatable mRNAs, modulated, 1478
- Polyadenylation
signal in *tk* substituted by monkey DNA library, 643
signals in Cos-1 cells analyzed with *tk* gene derivatives, 267
- Polyamine
synthesis, arrest, 480
- Polyomavirus
DNA effects on thymidine kinase gene expression in TK⁻ mouse cells, 511
DNA-thymidine kinase gene recombinant plasmids, 511
early proteins in tumorigenesis, 1451
heat shock protein synthesis in permissive cells, 1
plasmid recombinants with transforming potential, 1670
- Porcine major histocompatibility DNA
expression in mouse L cells, 2006
- pp60^{src}
high levels in neural tissues, 1157
- P¹P⁴-di(adenosine-5')tetraphosphate
inhibition of pp60^{src} kinase, 1718
- pp60^{src}
adhesion plaque location on transformed cells, 731
association with pp90 and pp50 in transformed chicken cells, 9
cytoskeletal proteins phosphorylated, 102
kinase, inhibited by P¹P⁴-di(adenosine-5')tetraphosphate, 1718
microinjected, induces actin transformation, 102
synthesis in virus-transformed rat cells reduced by interferon, 1656
- pp60^{v-src}
phosphotransferase specific activity increased, 1589
- Prepro- α -factor pheromone
different yeasts, 1440
- Pre-rRNA, mouse
cleavage sites, 1501
- Procollagen
mRNA control of synthesis, 241
- Protein kinase
S49 cell cAMP-dependent mutant, reversion, 250
substrate for tyrosine-specific, 340
- Protein synthesis
in spite of mRNA breakdown, 64
- PUT5
S. cerevisiae, proline utilization, 1846
- Pyrimidine
dimers in UV-damaged SV40 DNA, 1403
- Rat growth hormone gene
inactivity in liver tumor cells, 1460
- Rat skeletal myoblasts
lectin-resistant mutants, 2166
- rDNA
mouse, sequences, 1488
- Recombination
monkey cells, homologous and nonhomologous, 1040
- Retinoic acid
induced muscle differentiation, 2280
induced neural differentiation, 2271
- Retrovirus
transduction studies, 2180, 2191
- Reversion
S49 cell cAMP-dependent protein kinase mutant, 250
- Ribonucleoproteins
ribosomal, nuclear transport in *Tetrahymena*, 693
structure altered by heat shock in *Drosophila*, 161
- Ribosomal proteins
ribonucleoprotein export from *Tetrahymena* nuclei, 693
S. cerevisiae, effects of mild temperature shock, 457
- Ribosomal ribonucleoproteins
temperature effects on transport in *Tetrahymena*, 693
- Ribulose-1,5-bisphosphate carboxylase
gene and mRNA, pea plants, 587
- RNA
simian virus 40 splice junction deletion mutant, 1381
splicing, adenylation, transport, 1381
- RNA polymerase II
 α -amanitin resistance mutations, effects on myogenesis, 946
hepatitis B virus transcription, 1766
initiation of runoff transcripts, 2172
pausing and termination of transcription, 1687
promoters in avian sarcoma virus long terminal repeat, 811
transcript encoded by hepatitis B virus, 1774
- RNase
multiple types in *X. laevis* oocytes, 1711
- Rous sarcoma virus
gag gene expression in *E. coli*, 1746
pp60^{src}, association with chicken cellular proteins, 9
pp60^{src} localization in transformed cells, 731
pp60^{v-src} specific activity increased, 1589
transcriptional elements within long terminal repeat, 1834
transformed rat cells, reduced pp60^{src} in, 1656
- rRNA
co-amplification with CAD genes in Syrian hamster cells, 2066
extrachromosomal, inheritance in *Physarum polycephalum*, 635
HeLa cells, adenovirus infection effects, 662
mitochondrial in glucose-repressed *S. cerevisiae*, 1949
5S genes in *Xenopus*, nucleosome arrangement, 720

Runoff transcripts

initiation and formation, 2172

Saccharomyces carlsbergensis

MAL gene family, 796

Saccharomyces cerevisiae

ADRI gene, isolation and characterization, 360

alcohol dehydrogenase expression, 20

ammonia regulation of amino acid permeases, 672

ARO1 cluster gene isolated, 1609

catalase T structural gene, 1545

CDC8 gene cloned, 1730

cdc2 mutant, stably denatured chromosomal DNA, 1665

chitin deposition in cdc mutants, 922

chromosome III ring derivative, 803

E. coli β -galactosidase produced in, 1625exclusion of M₂ double-stranded RNA, 654

gene product function during cell division, 1255

HSP90-*E. coli* lacZ fused gene, 1625

invertase production and SUC2 mRNA, 439

killer systems, 654

killer toxin glycosylated precursor, 1362

killer toxin secretion, 1362

leu2 fused to *E. coli* β -galactosidase gene lacZ, 580

mitochondrial rRNA in glucose repression, 1949

mitochondrial tRNA gene, expression, 371

mitochondrial var1 gene, transcriptional analysis, 1615

mitotic recombination, 1204

multiple, tandem plasmid integration, 747

new chromosome, 415

oxalurate induction of multiple

URA3 transcripts, 1889

physiological control of repressible acid phosphatase, 839

plasmid recombination reduced by sequence heterogeneity, 1204

prepro- α -factor gene, 1440

PUT2 for protein utilization, 1846

repressible acid phosphatase genes, 5'-end analysis, 570

repressible acid phosphatase genes, mapping, 562

ribosomal protein genes in mild temperature shock, 457

SAD, an extra α cassette, 871

S-phase-defective cdc2 mutants, 1000

start genes CDC36, CDC37, CDC39, 881

SUC genes, organization, 351

SUC2 mRNA, 439

transposable element-associated mutations, 20

Saccharomyces spp.maltose fermentation: *S. carlsbergensis* MAL genes, 796prepro- α -factor genes, 1440

SUC genes, 351

Sea urchin

actin gene family, 1824

H1 and core histone mRNAs, 974

linked actin genes, 448

pluteus embryo mRNAs cloned, 1021

Simian virus 40

A gene deletion mutants, coded proteins, 220

72-base-pair repeat, requirement for transcription, 991

deletion mutant F8dl able to transform mouse cells, 290

deletion mutants that transform with reduced efficiency, 484

early- and late-region promoter functions enhanced, 991

heat shock protein synthesis in permissive cells, 1

induction stimulated by 12-O-tetradecanoylphorbol

13-acetate, 757

pBR322 recombinant plasmids, chromatin structure, 2203

recombinant virus containing Harvey sarcoma virus LTR, 325

regulatory-deficient natural recombinants, 1930

splice junction deletion mutants, RNA structure, 1381

T-antigen gene deletion mutants, 214, 220

T-antigen mutants defective in DNA replication, 1958

T antigen, mutational analysis, 203, 214

transformed rat tumor cells, 1138

tumor antigens, related to mutagenesis, 421

UV-damaged, pyrimidine dimers in, 1403

Small nuclear RNA

synthesis, sensitivity to UV, 2151

U1, location and expression, 2211

SS-B/La antigen

adenovirus, associated phosphoprotein, 1235

Styx sp.

DNA replication forms, 1562

Substrates

tyrosine-specific protein kinase, location, 340

SUC genes

organization in *Saccharomyces* spp., 351

Syrian hamster cells

amplified CAD genes, 2066

amplified DNA in N-(phosphonacetyl)-L-aspartate-resistant lines, 2076

neoplastic conversion rate, 931

single-step mutants, 2089

T antigen, simian virus 40

deletion mutant-encoded, activity, 220

deletion mutants, functions, 214

DNA replication-defective mutants, 1958

mutational analysis, 203, 214

Temperature

effects on ribosomal ribonucleoprotein transport in *Tetrahymena*, 693

Tetrad data

equation to determine genetic map distances from, 1886

12-O-Tetradecanoylphorbol 13-acetate

inhibition of collagen synthesis, 1527

stimulation of simian virus 40 induction by DNA damage, 757

Tetrahymena thermophila

conjugation-specific mRNAs, 1857

cycloheximide-resistant mutant, altered growth, 503

germ line-specific DNA on micronuclear chromosomes, 1909

nuclear transport of ribosomal ribonucleoprotein, 693

ribosome mutant, 503

Thymidine kinase gene
